

I am an over-the-road truck driver. I strongly support XM satellite radio and all of the programing they provide. The traffic and weather channels are very helpful in planing my routes. I am asking that you reject the NAB's petition 04-160. In my opinion, XM satellite radio is not in competition with AM or FM but is an additional means of information and entertainment. It is up to the people to decide where the get there news and information from whether it be AM FM or XM. Thank you, Dan Chandler
